

NWS FORM E-5 (11-88) (PRES. BY WSOM E-41)		U.S. DEPARTMENT OF COMMERCE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION NATIONAL WEATHER SERVICE		HYDROLOGIC SERVICE AREA (HSA) San Angelo, TX	
MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS				REPORT FOR:	
				MONTH YEAR November 2002	
				SIGNATURE <div style="text-align: right;"> Jason Johnson In Charge of HSA </div>	
TO: Hydrometeorological Information Center, W/OH2 NOAA / National Weather Service 1325 East West Highway, Room 7230 Silver Spring, MD 20910-3283				DATE December 12, 2002	

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41)

[X] No flood stages were reached in this HSA for the month above.

Rainfall for the month of November was below normal for much of the HSA. Little of the wet weather that we experienced during the month of October carried into November. Light to moderate rain occurred across the HSA from the 1st through the 4th of the month, but a dry weather pattern soon set up over West Central Texas that was not favorable for moisture return from the Gulf of Mexico. A series of dry cold fronts moved southward through the region, bringing colder air. These cold fronts were followed by high pressure systems, which brought mainly clear skies and low humidity.

For the month of November, San Angelo received 0.52 of an inch of rain. This is 0.58 of an inch below the monthly normal of 1.10 inches. Abilene received 0.93 of an inch of rain, which is 0.37 of an inch below the monthly normal of 1.30 inches.

Rainfall Totals for November

Station Name	Amt (in)	Station Name	Amt (in)
Abilene 2	1.18	Menard	0.86
Albany	0.81	Ozona 1SSW	0.45
Anson	1.69	Putnam	0.81
